FUSARO

Basins + WCs

The design of Fusaro begins with pure geometric shapes and a linear clarity of vision that is the essence of creative architecture. The hard lines have been refined to create softer angles with fine edges and a subtle radius. Even the waste is integrated into the design and comes in a choice of chrome or ceramic finishes. The result is a range of elegant, beautifully balanced ceramics that combine the precise with the sensory.

The distinctive curved front of the Fusaro WC bowl is echoed in the slight upturn of its slim seat. The range of WCs include AquaBlade® flush technology ensuring that performance mirrors the promise of this sculptural design.
