AN EXTRAORDINARILY
ELEGANT BASIN RANGE
THAT PUSHES REFINEMENT
TO THE LIMIT

ELLERO

Basins

Achieving 'light design'
has long been the elusive
goal in bathroom ceramics.
And then there was Ellero.

LIGHTNESS WITH INNER STRENGTH

This revolutionary vessel's inimitable fine edges appear as delicate as those of a shell, but a unique composition of innovative materials gives it exceptional resilience. Ellero is a game-changing solution for bathrooms that demand a luxury aesthetic and reassuring robustness.

INNOVATIVE DIAMATEC TECHNOLOGY

Our ground-breaking new material, Diamatec, is the culmination of over 200 years of innovation.

For the first time, it allows the creation of ceramics with very fine, straight edges and surprising inherent toughness.

The technology combines strength-giving ingredients, including Alumina, known for its hardness, and Chamotte which prevents cracking.

INCREDIBLE STRENGTH

The unique combination of material in Diamatec has produced outstanding results in independent materials testing and enables the construction of the first super-thin vessel with the option of an overflow.

The final product is particularly suitable for demanding environments, such as hotels and restaurants, where the need to combine strong aesthetics with hard-wearing durability is paramount.

ELLERO

Basins

The Ellero range comprises three configurations. The vessel **without overflow** provides the cleanest design aesthetic, ideal for high-end residential projects.

A vessel **with overflow** in such a thin structure is uncommon, and the tough ceramic allows for an especially narrow opening, a practical variant created with hotel use in mind. An option with a deck provides a space for toiletries and includes a tap hole.

ELLERO 55CM VESSEL BASIN

Model	Ref.
55cm vessel basin with overflow, no taphole	E142701
55cm vessel basin no overflow, no taphole	E142501

Basin secured with fixation set provided and silicon sealant

ELLERO 55CM VESSEL BASIN

Model	Ref.
55cm vessel basin with overflow, one taphole	E142601

Basin secured with fixation set provided and silicon sealant
